PROJECTS

Catastrophe Aid

In topcoder hackathon along with my partner I developed a web application named as Catastrophe Aid that helps users to find details about the disaster prone areas.

Marks Analyzing system

I with the help of my professor developed a web application Marks Analyzing system. This is an Undergraduate College project, which analyze the marks of student and help them to find their area of interest.

India Tour

This is a firefox Os application which helps users to stay updated with the information of tour and tourism in India. It was the first application of mine.I gone through the study of various beautiful places in India.
